Ethics and Integrity are probably the two most important traits each elected official should have.

Recently a social media post by a local individual created some stir about a possible land purchase in the county. There are situations in which county government collaborates with state and federal agency's to improve the quality of life of our community members. Many times projects require confidential discussions from not only a legal standpoint but a competitive and strategic standpoint to benefit you the taxpayers. The open meetings act does legally give us the ability to have these discussions prior to official decisions being made in a public forum.

Don't be fooled titles don't make leaders.

Integrity , character , leadership, and
dedication to excellence define leadership.

Don't let the sale pitch make you think a
change in title will solve the problem of the
day.

When it comes to the topic of Charter government, it's important to remember that the title of the leader is not what grants them a seat at the table or power. Instead, it's the leader's character and ability to lead that truly makes a difference. In Annapolis, the population of the county is the biggest factor in determining influence. The more population a county has, the more influence it will have.

I am disappointed that portions of information from a confidential meeting between commissioners has leaked out which could compromise a very important and positive project for the community.

The post only placed portions of information in the public view which does not paint the full picture of the situation .

休息

Rest assured that I will ALWAYS represent you with integrity and always put the people in our entire community first .

Why vote Against Question A?

- ^{67.29} Accountability of our elected officials doesn't require a change of government, it requires an active population and leaders willing to address malfeasance and/or moral turpitude no matter the source or the political party of those at the center of such behavior.
